Emmanuel Olamilekan

Frontend Developer | Web Development Tutor & Technical Mentor

Professional Summary

Frontend Developer and Tutor with 2+ years building 6+ client projects and mentoring aspiring developers in HTML, CSS, JavaScript, and PHP. Additional experience in Python (Flask, Pydantic) and customer service, with a background in remote, cross-functional support roles.

Professional Experience

Customer Service Representative Nov 2025 - Jun 2026
[Retail Corp](#) | [Remote](#)

- Handled inbound customer inquiries via phone, email, and chat, resolving issues promptly and maintaining high satisfaction ratings.
- Processed orders, returns, and account updates accurately while adhering to company policies and service standards.
- Collaborated with cross-functional teams remotely to escalate and resolve complex customer issues in a timely manner.

Frontend Developer (Freelance) Jan 2022 - Present
[Self-Employed](#) | [Lagos, Nigeria](#)

- Designed and developed 6+ responsive websites using HTML, CSS, JavaScript, Bootstrap, and PHP.
- Collaborated with clients to gather requirements, then deployed and maintained solutions via cPanel.

Web Development Tutor & Technical Mentor Jan 2022 - Present
[GCrown IT Solutions](#) | [Lagos, Nigeria](#)

- Trained aspiring developers in HTML, CSS, JavaScript, and responsive design through hands-on projects.
- Created educational resources and provided mentorship to help learners deploy their first web apps.

IT Support & Trainee Developer (SIWES / Industrial Training) -
[GCrown IT Solutions](#) | [Lagos, Nigeria](#)

- Provided IT support and gained hands-on experience in website deployment, Git, and IT operations.

Church Media Team Member & Instrumentalist -
[Volunteer Service](#)

- Managed digital media systems during live programs, ensuring reliable technical execution for events.

Education

Higher National Diploma (HND) - Computer Science Jan 2023 - Dec 2025
[Gateway ICT Polytechnic](#)

National Diploma (ND) - Computer Science Jan 2020 - Dec 2022
[Gateway ICT Polytechnic](#)

Projects

Web-Based Student Feedback Collection and Analysis System

Designed and developed a comprehensive feedback management system for educational institutions. Built secure data collection and storage functionality for student evaluations. Developed an administrative dashboard for analyzing and managing responses. Implemented responsive design principles to ensure accessibility across devices.

[HTML](#) | [CSS](#) | [JavaScript](#) | [PHP](#) | [MySQL](#)

Real-Time Face Detection and Recognition System

Developed a real-time facial recognition system capable of detecting and identifying individuals through live video streams. Integrated image processing, dataset training, and recognition algorithms. Improved system accuracy through optimization and testing.

[Python](#) | [OpenCV](#) | [face_recognition](#)

Initiative for Social and Economic Inclusivity of Underprivileged Persons (ISEIUP) Website

Developed and maintained a professional organizational website supporting community outreach and public engagement. Implemented responsive layouts and user-friendly navigation. Enhanced the organization's digital visibility and accessibility.

Personal Tutorial Platform

Built an educational web platform focused on teaching web development concepts. Implemented structured content presentation and responsive user interfaces. Applied frontend development best practices and deployment techniques.

E-Commerce Website (Jumia-Style Interface)

Developed a modern shopping interface featuring product listings, category filtering, and shopping cart functionality. Focused on responsive design and user experience optimization. Implemented interactive frontend components to improve usability.

[HTML](#) | [CSS](#) | [JavaScript](#) | [SASS](#)

Flask REST API with Pydantic Data Validation

Built a Python backend service using Flask to design and deploy RESTful API endpoints. Used Pydantic models for request/response data validation and serialization, improving data integrity and reducing runtime errors. Structured the codebase for maintainability and testability.
